### Chairman's statement

### Dear Shareholder,

I have great pleasure in presenting the Company's Half-Yearly Report and Condensed Consolidated Financial Statements for the six-month period ended 30 November 2022. The period has been one of great progress for the Company. The Company's Joint Venture ("JV") with Demir Export A.Ş ("Demir Export") is now well underway to continue the exploration and development of the new district scale gold trend which Conroy Gold discovered in the Longford-Down Massif in Ireland.

A new gold discovery was made post period as announced by the Company on 22 February 2023, with visible gold and assay results of up to 123 g/t gold in quartz breccia samples during prospecting over the Company's Mines Royal (Newtownhamilton) option area in County Armagh in Northern Ireland. The new discovery is potentially a transformational event for gold exploration and development in the Company's licence area and, taken in conjunction with the Company's other significant discoveries, indicates the potential for the district to become a Tier I gold area.

#### **Technical Results**

Technical results during the period and post period end included excellent drilling results. A step-out drilling programme on the stockwork demonstrated an extension of over 375 metres to the northeast of the Clontibret gold deposit and extended the bedrock gold mineralisation further outside the gold-in-soil footprint at Clontibret which has a surface area of c.125 hectares.

The Clontibret gold resource is known to be open in all directions and to depth and comprises two styles of gold mineralisation: (i) lodes; and (ii) stockwork.

Three gold lodes, with grades up to 8.3 g/t over 0.5 metres, were intersected in a drill hole located approximately 200 metres to the south of the Corcaskea gold target. This has yielded significant gold intersections in trenches, including 16.5 metres of 6.5 g/t gold and 12 metres of 4.9 g/t gold. The drill hole was 70 metres north-east of the gold outcrop (5.6 g/t gold) discovery which was the crucial first step in establishing continuity between the Corcaskea gold target and the Clontibret gold deposit, on which the Company has defined a gold resource of 517,000 ounces of gold. The three intersected gold lodes are additional to this gold outcrop, further establishing continuity between the Clontibret gold deposit and the Corcaskea gold target.

The technical emphasis is very much on defining not only the mining potential of the Clontibret gold deposit but the overall potential of other gold targets in the entire gold district. To this end a drilling programme on the nearby Clay Lake gold target, which has an even greater gold-in-soil footprint than the Clontibret gold target, commenced in February 2023.

Chairman's statement

Following on from the successful step out drilling at Clontibret, the continuity demonstrated between Clontibret and

Corcaskea and the latest discovery in County Armagh, further drilling will be directed towards confirming the overall

gold potential of the JV licence area. The objective of these activities is to fulfil the JV's primary aim of bringing in a gold

mine at Clontibret, or elsewhere along the gold trend, and, ultimately, a series of gold mines along the trend.

**Finance** 

The loss after taxation for the half year ended 30 November 2022 was €103,577 (for the six-month period ended 30

November 2021- €278,699) and the net assets as at 30 November 2022 were € 22,623,787 (for the six-month period

ended 30 November 2021- €19,708,801).

**Directors and Staff** 

I would like to thank my fellow directors, staff and consultants for their support and dedication, which has enabled the

continued success of the Company.

Outlook

I look forward to the Company, in conjunction with its JV partner Demir Export, continuing to make progress at an ever

accelerated level with the exploration and development of our JV licences and the continued enhancement of the

Company's undoubted asset base.

Yours faithfully,

Professor Richard Conroy

Chairman

### **Basis of consolidation**

The condensed consolidated financial statements include the condensed financial statements of Conroy Gold and Natural Resources plc and its subsidiaries. Subsidiaries are entities controlled by the Company. Control exists when the Group is exposed to or has the right to variable returns from its involvement with the entity and has the ability to affect those returns through its control over the entity. In assessing control, potential voting rights that presently are exercisable are taken into account. The condensed financial statements of subsidiaries are included in the condensed consolidated financial statements from the date that control commences until the date that control ceases. Intra-Group balances, and any unrealised income and expenses arising from intra-Group transactions are eliminated in preparing the condensed consolidated financial statements.

### 4. Intangible Assets (continued)

Exploration and evaluation assets relate to expenditure incurred in the development of mineral exploration opportunities. These assets are carried at historical cost and have been assessed for impairment in particular with regard to the requirements of IFRS 6: *Exploration for and Evaluation of Mineral Resources* relating to remaining licence or claim terms, likelihood of renewal, likelihood of further expenditure, possible discontinuation of activities as a result of specific claims and available data which may suggest that the recoverable value of an exploration and evaluation asset is less than its carrying amount.

Licences in both the Republic of Ireland and Northern Ireland in the Longford Down Massif were transferred to three subsidiary companies as set out in Note 3. All prior costs capitalised in line with IFRS 6 as above, in relation to these three licences, were transferred to the subsidiaries where the licences are now held. Costs incurred in the current year in relation to the three licences are recorded at a subsidiary level. The Board of Directors have considered the proposed work programmes for the underlying mineral resources. They are satisfied that there are no indications of impairment. The Board of Directors note that the realisation of the intangible assets is dependent on further successful development and ultimate production of the mineral resources and the availability of sufficient finance to bring the resources to economic maturity and profitability.

### 5. Non Controlling Interests

Convertible Shares held in Subsidiary Companies

Under the terms of the joint venture and related agreements entered into between the Company and Demir Export on 31 December 2021, in return for fulfilling funding and other obligations as set out in the agreements, Demir Export will earn an equity interest in certain wholly owned subsidiaries of the Company (See Note 3). The investment by Demir Export is effected by the issuance of convertible shares in each subsidiary company which have no voting or participation rights. At 30 November 2022 Demir Export had invested €2,557,217 in the subsidiary companies. This amount is recorded in the condensed consolidated financial statements as a non-controlling interest.

When all of the conditions (including, inter-alia, a minimum of €5.5 million in cash investment) in relation to the first phase of the joint venture operation (Phase 1) have been fulfilled, the convertible shares will be converted into ordinary shares in each subsidiary company such that Demir Export will hold a 25% ordinary equity interest in each company. Demir Export can earn further equity in each subsidiary company by meeting the commitments set out in Phases 2 and 3 of the joint venture.

The joint venture agreements provide that in certain limited circumstances, Demir Export will be entitled to a net smelter royalty in the licences, capped at the level of investment made, in lieu of their convertible shares, should it exit or terminate its involvement in the joint venture during the current Phase 1 stage.

### 6. Convertible loan

On 15 July 2019, the Company entered into an unsecured convertible loan agreement for €250,000 with Hard Metal Machine Tools Limited (the "Lender"). A further unsecured convertible loan note for €100,000 was issued on 30 October 2019 to the Lender and carried a similar interest rate and a conversion price of 6 pence sterling per share. Both loan notes together with all accrued interest were converted into a total of 5,417,935 new ordinary shares in the capital of the company during the period.
